VAT on Sales through websites such as *amazon.com* and *costco.com*, Europe

North American companies that sell products through websites such as *amazon.co.uk* and *costco.co.uk* in the United Kingdom or other countries in Europe will many times have to deal with Value Added Tax (VAT) if they ship the products to any of the fulfillment warehouses in Europe.

Sample of VAT rates:

Belgium BTW/TVA	21%
France TVA	20%
Germany MwSt/USt	7% / 19%
Netherlands BTW	6% / 21%
Sweden Moms	12% / 25%
United Kingdom VAT	20%

North American companies will frequently find that:

1. Around 20% VAT will be assessed by customs in the country of import, in addition to the duty. This VAT is generally only refundable if the North American company registers for VAT in the country of import.
2. The EU websites, such as Amazon and Costco, require that the vendor merchant follows the local VAT laws of the country, which often means that the North American company must register for VAT and charge VAT to the customers. This means that the North American company has to:
 1. Register for VAT in the country of import, such as the UK
 2. Charge VAT to the customer
 3. Can also deduct the VAT paid upon import and to vendors in the UK

The basics for the VAT system is that it should not be a cost to any companies involved in the distribution chain, but it will end up as cost to the private person who buys the product in the end.

Please contact Euro VAT Refund, Inc. for clarification and assistance, so the VAT does not end up as a cost to the North American Company or its business customers in Europe.
